DRUG AND ALCOHOL SUBSTANCE ABUSE POLICY

1. Intent

The intent of this policy is to assist in maintaining a work environment for employees, free from alcohol and drug abuse, at all operations. Therefore, all employees are

- 1.1. Required to report for work free from the influence of alcohol or other drugs
- 1.2. Not permitted to use, possess, manufacture, sell or otherwise distribute alcohol or drugs on company premises.
- 1.3. While it is recognized that alcohol and drug dependency may contribute to impaired work performance and costs to the Company and employees in many ways, it is also recognized that such dependency is both an illness and treatable condition.
- 1.4. Therefore, this policy is further intended to encourage the identification of affected employees for appropriate treatment on a strictly confidential basis. Employees needing help shall be made aware of and encouraged to participate in an established Employee Assistance Program (EAP). Such program shall receive full commitment and sincere support from management at each operation. There shall be no retribution nor special privileges as a result of employee EAP participation

2. Program Purpose

It is recognized that the Company's greatest asset is its work force. Its present prosperity and future prospects depends on its people. It is obvious that continuous improvement can only be achieved through the effort of each and every employee. In a very practical sense, we are all partners in the business

- 2.1. It is also recognized that each employee has a personal potential and capacity to contribute, through his or her job performance, to the overall performance of the Company. However, as in any community, outside factors may adversely affect an individual's ability to make a full contribution.

- 2.2. Therefore, the purpose of this program is to establish an environment in which employees can freely seek assistance and support to minimize those outside factors that diminish their ability to contribute to the Company through acceptable job performance
- 2.3. It is further recognized that people who are alcoholic or drug dependent, struggling with marital difficulties, suffering from anxiety or depression, or having financial difficulties, cannot be efficient workers. Often the pattern of job performance deterioration may be evident, but little action is taken because there is concern that the affected employee will be terminated, not helped.
- 2.4. In belief that all employees are valued, sincere efforts shall be made to retain, not terminate, substance affected employees, whenever reasonably possible. It is also believed that this investment in employee assistance will significantly improve the job performance and well being of all employees.
- 2.5. Therefore, management of Fireline, Inc. will promote and support the formation of a Joint (management and union) Employee Assistance Committee at each plant location. These Committees are to become well versed in the multitude of professional and community services available to affected employees.
- 2.6. The Company will provide such Committees with training, except in regard to diagnosis to:
 - 2.6.1. Explain the benefits provided for treatment
 - 2.6.2. Lead the local employee assistance efforts through participation, education, training and communications activities
 - 2.6.3. Periodically evaluate the utilization and perception of the program by employees and supervisors, and continue to educate and train other employees and supervisors on a regular basis
- 2.7. The medical department or an outside source with an accredited EAP Professional will be available to diagnose, counsel and refer impaired employees for appropriate treatment.

3. Testing and Procedures

In commitment to and in pursuit of the objective to provide all employees with a safe work place, free from the influence of alcohol and other drugs, the following testing procedures for all employees are established.

- 3.1. As used herein a drug is any of the substances defined and noted in the official Federal Government List of Drugs and Harmful Substances as used by the Bureau of Narcotics and Dangerous Drugs

3.2. Certain prescribed drugs may affect job performance. Questions pertaining to prescription drugs shall be referred to an appropriate professional medical resource.

3.3. Alcohol testing will be done by an accredited operator using maintained and calibrated breathalyzer equipment and a Blood Alcohol Test required as noted in Section C-4-F of this agreement. Results shall be subject to the equivalent standard under plant location State law for driving a motor vehicle under the influence of alcohol.

3.3.1. Should any employee believe that his or her given breathalyzer test result is in error, he or she may request, without cost, that blood-alcohol test be given.

3.4. Testing for drugs other than alcohol shall be conducted through urinalysis, performed by a certified laboratory listed as approved by the Department of Health and Human Services. Any initial test found positive shall be confirmed by a gas chromatography/mass spectrometry (GC/MS) test before being reported back as positive.

3.4.1. A split-sample of each specimen provided shall be retained to provide a follow-up test to any initial test believed in error or otherwise adulterated. Strict chain-of-custody and security shall be maintained in the handling of all specimens.

3.5. Testing for alcohol or other drug substances shall be conducted under the following conditions

3.5.1. As required by Federal and/or State Department of Transportation (DOT) regulations

3.5.2. Pre-employment physical examination

3.5.3. Physical examination following drug or alcohol rehabilitation

3.5.4. A prior positive alcohol or drug test. (The prior positive alcohol or drug test is one that occurred within the last six (6) months)

3.5.5. Probable cause, based upon observation and good faith belief that an employee is under the influence of drugs or alcohol while on the job. Such belief may be based upon

3.5.5.1. The smell of alcohol

3.5.5.2. Slurred speech

- 3.5.5.3. Staggering gait and/or other abnormal physical or psychological behavior typically associated with drug or alcohol intoxication or impairment.
- 3.5.5.4. Whatever the observation, it shall be made by two persons and documented in writing
- 3.5.5.5. Involvement in an accident or incident on Company premises where an involved person is injured and is sent to an off-site medical facility for treatment of an injury
- 3.5.5.6. Involvement in a serious accident or incident on Company premises where as part of an immediate and routine investigation, there is reason to believe as described under “*probable cause*” above that drugs or alcohol may have contributed to the cause of the accident or incident; and
- 3.5.5.7. Where testing is applicable, the test will be performed at a medical facility.

4. Refusals

Refusal to provide:

- 4.1. Blood sample, required as noted in this policy
- 4.2. Urine sample
- 4.3. Submit to a breathalyzer as required under this policy
- 4.4. The submittal of a doctored/tampered with sample shall result in a five-day disciplinary suspension and will be considered a positive result for application of this policy.
- 4.5. A negative test result must be received before any employee who has refused returns to work.
- 4.6. Any second refusal within a twelve (12) month period from the time the employee returns to work will result in further discipline including possible discharge action.

5. Positive Tests

No prospective employee who tests positive on a pre-employment physical examination shall be hired.

- 5.1. Probationary employees refusing to be tested, or testing positive, pursuant to this policy shall be discharged.
- 5.2. No additional discipline other than lost time shall be imposed upon an employee for a first positive result. The following actions shall be taken:

- 5.2.1. Any employee testing positive for the first time shall not be permitted to return to work until a negative test result is received by the Company. At the discretion of the employee but within a 30-day time period, each employee shall determine when to take a retest.
- 5.2.2. Any employee who tests positive then subsequently tests negative shall be returned to work. However, each such employee may be retested on two separate occasions within six (6) months following their return to work, and if any such retest is positive, the employee shall be subject to disciplinary action including possible discharge.
- 5.2.3. If both tests are negative, the employee shall be treated as though he/she had never had a positive drug test and any subsequent positive test shall be treated as the first positive test for such employee under these rules.
- 5.3. Each employee testing positive for the first time shall be made aware of the Employee Assistance Committee for appropriate support pursuant to the Company's Employee Assistance Program and may be referred to an E.A.P. Professional.
 - 5.3.1. Each employee testing positive for the first time shall obtain a retest within a reasonable length of time, but not later than 30 calendar days after the positive test or, if applicable, completion of a drug rehabilitation program. Failure to be retested within such time frame could result in further discipline up to and including discharge.
- 5.4. Any employee testing positive more than once within a twelve (12) month period from the day the employee returns to work shall be assessed by a professional rehabilitation counselor
 - 5.4.1. Failure to follow up on assessment or the prescribed treatment plan of the professional rehabilitation counselor may subject an employee to further discipline, up to and including discharge.
 - 5.4.2. If the discipline is less than a discharge, the employee must have a negative test before returning to work, not to exceed 30 days after the last day of discipline.

6. Rehabilitation Programs

Any employee who completes a rehabilitation program and tests

- 6.1. Positive on their return to work physical examination, shall be treated as an employee who has tested positive more than once; negative shall be returned to work.
- 6.2. However, each such employee may be retested on two separate occasions within six (6) months following their return to work or on such number of occasions and for such a period as recommended by the professional rehabilitation counselor.
- 6.3. If any of such retests are positive, the employee shall be treated as an employee who has tested positive more than once
- 6.4. If all such tests are negative, the employee shall be treated as though he/she had never had a positive drug test. A subsequent positive test shall be treated as the first positive test for the employee under these rules.

7. Drug Test Levels and Laboratory Analysis Procedures
